Dezly Macauley

Email: dezlymacauley@gmail.com | **GitHub:** https://github.com/dezlymacauley

Skill Overview

- Programming: Rust, Go, Python, TypeScript
- DevOps: Terraform, AWS
- Linux: Arch Linux, Bash
- Database Development: Postgres, SQLite

Training

- Google: Tools of the Trade, Linux and SQL
- Duke University: Rust Fundamentals
- University of Michigan: Exploring C
- King Edward VII: Highschool

Experience

LangChain RAG App (https://github.com/dezlymacauley/langchain-rag-app**)**
Building a retrieval-augmented generation (RAG) pipeline in Python with LangChain and Google Gemini. Implemented document chunking, Gemini embeddings and similarity search over a vector store, using a provider-agnostic design that allows swapping models.

Terraform S3 Static Website (https://github.com/dezlymacauley/terraform-s3-static-website)
Provisioned and managed AWS S3 infrastructure using Terraform, including bucket configuration, public-access controls, and resource policies. Developed a reproducible local cloud development environment using Docker and Floci to test infrastructure without incurring live AWS resource costs. Automated development workflows using mise and Bash, streamlining tool installation, environment configuration, infrastructure provisioning, and resource clean. Documented infrastructure deployment, verification, and teardown procedures to support repeatable development and resource lifecycle management.

Kantar Group: Research Executive
